Dear Student:

SUBJECT: HEALTH INFORMATION

Lincoln College requires that all full time and resident students submit a completed Health Form prior to registering for classes. The Health Form must include a health history signed by the student and a complete physical exam by a licensed practitioner (MD, PA, APRN). The physical exam must have occurred within the last year and must be signed by the licensed practitioner.

All part time students are required to submit a Tuberculosis Screening and documentation of required immunizations as well as the first two pages of the health form.

The following immunization documentation is required:

1. **Meningitis Vaccine** - Required by Connecticut State Law for all students who reside in on-campus housing. **Lincoln College can not allow you to move into the dormitory if you have not received this vaccine.** Commuting students are not required to have this vaccine. It is recommended for all students.

2. **Measles Vaccine and Mumps Vaccine** - Connecticut State Law requires that students born after December 31, 1956 show proof of **two** doses of measles vaccine or laboratory tests confirming immunity.

3. **Rubella Vaccine** - Connecticut State Law requires that students born after December 31, 1956 show proof of one dose of rubella vaccine or laboratory tests confirming immunity.

4. **Tetanus Vaccine** - Required within the last 10 years.

5. **Chicken Pox (Varicella)** - Documentation of **two doses** of vaccine or history of disease or laboratory tests confirming immunity required for students born after 1980.

6. **Hepatitis B** - Series of three vaccines recommended.

7. **Tuberculosis Risk Assessment** - Required within the last year. Results must be documented. For positive test results, please submit chest x-ray results and treatment plan if applicable. Some Allied Health Students need to have a yearly PPD.

    **Students will not be allowed to schedule classes with an advisor without complete medical documentation.**

Immunization records may be obtained from your high school or your doctor’s office. Please feel free to contact me at the college if you have any questions or concerns.

Sincerely,

Kathleen Bergeron R.N;B.S.N
